

The Alberta Advantage

Alberta, Canada actively conducts **clinical trials and research in all phases and disease areas**. Coupled with a **robust life sciences industry**, we invite pharmaceutical, biotech, and medical device companies to discover the benefits of our world-class investigators, high-quality research, integrated clinical trial infrastructure with healthcare delivery systems, diverse patient population and thriving commercialization environment.

Dynamic Clinical Trial Environment

1400+

active trials

24%

of Canadian trials conducted in Alberta

850+

trial sites with highly qualified personnel

4.4 million

diverse & engaged population

3

medical & research-intensive universities

REB Exchange

for faster, more efficient multisite trials

EMR System

with a population of over 4 million

Real World Evidence

capabilities

Patient Engagement

platform for active trial recruitment

Vibrant Life Sciences Industry

\$1 Billion

revenue generated by life sciences industry

35%

revenue & investments from US & international markets

\$66.8 Million

in precision medicine diagnostics expertise and infrastructure

Alberta Machine

Intelligence Institute

Canada's preeminent center of artificial intelligence

**Clinical Trials
Alberta**

In Alberta, it's possible.

Learn why Alberta is one of North America's most dynamic clinical trial destinations.

Who we are?

We are a **partnership** of academic, government and healthcare delivery organizations.

We enable **high-quality clinical trials and clinical health research** to improve the health of Albertans and people across the globe.

We offer **centralized access for industry and researchers** to engage with Alberta's clinical trial sites and assets.

How can we help you?

From concept through conducting the study, to evidence, commercialization, or into care, we can at no cost connect you into Alberta's ecosystem of qualified investigators, sites, biomanufacturing and other life sciences for a successful project.
